### **Status of Application**

1. Applicant's amendment, filed June 30, 2004, has been entered in the application. Claim 1 is pending, claims 2-20 have been canceled by the most recent amendment.

### ***Drawings***

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the plurality of vehicle sensors comprising "at least an accelerator position sensor, a gear selector position sensor and a battery state of charge sensor" (claim 1, lines 10-12) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### **Claim Rejections - 35 USC § 112**

3. Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 1, line 12 and line 16 refer to the provision of a battery state of charge sensor, and the reliance upon a battery state of charge sensor output in

Art Unit: 3618

the determination of an idle mode, however the specification as filed fails to describe the inclusion of a battery state of charge sensor, or any applications of such a sensor. Claim 1, line 15 recites the use of a sensed rate of change of accelerator position in the determination of an idle mode, however the specification as filed fails to describe the measuring of such a quantity, or its use. Paragraphs 0014 and 0031 refer to a number of sensors including accelerator position, but not rate of change, and does not refer to battery state of charge at all. Paragraph 0015, 0033 and 0034 refer to some thresholds which may be employed, but again does not refer to battery state of charge or rate of accelerator position change.

#### **Claims not Rejected over the Prior Art**

4. Claim 1 is not rejected as being anticipated by or obvious over the prior art of record, however this claim is not in condition for allowance in view of it reciting subject matter that has not been described in the specification as filed.

#### **Response to Comments**

5. Applicant's comments describing the claimed invention are noted, however a number of the points which applicant has relied upon to define over the prior art are not actually described in the specification. Specifically, the specification makes no reference to a rate of change of accelerator position, nor does it make any reference to the use of a battery state of charge value.

#### **Conclusion**

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3618

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
